

Yegor Brusnyak

Applied AI Engineer

brusnyakyegor@gmail.com · github.com/brusnyak · linkedin.com/in/yegor-brusnyak · Bratislava, Slovakia · Available immediately

SKILLS

AI & Voice
LLM APIs, RAG & embeddings, prompt design, agent workflows, speech pipelines (Whisper, STT/TTS, Retell/ElevenLabs)

Back End
Python, TypeScript, Node.js, SQL · FastAPI, PostgreSQL, Supabase, pgvector, WebSockets

Front End
React, Next.js, JavaScript, Tailwind CSS

Tools & Infra
Git, Docker, Linux, pytest, Vercel, Stripe, API integrations

LANGUAGES

Ukrainian	Native
English	Fluent
Slovak	Intermediate
German	Intermediate

EDUCATION

B.Sc. Computer Science — STU Bratislava (FEI)
Information & Communication Technologies · expected 2027

Thesis: Real-Time Speech Translation During Online Conferences

SUMMARY

I design and ship voice agents, LLM-powered tools, and automation end to end — four systems built and deployed, from concept to working software.

PROJECTS

Recareo — AI voice-recall system recareo.uk

Voice agent that rebooks lapsed dental patients automatically; lead-enrichment pipeline, conversion-focused site, Stripe billing. Live.

AI Recruitment Copilot — candidate–job matching github.com/brusnyak/ai-recruitment-copilot

CV/JD parsing into schema-validated JSON, pgvector semantic retrieval, LLM fit scoring, automated eval harness with regression tracking.

AgentOps Control Room — AI outbound workflows github.com/brusnyak/agentops-control-room

Configurable multi-channel workflow engine — run versioning, regression checks, LLM-judge evaluation, full observability.

Real-Time Speech Translation — bachelor thesis github.com/brusnyak/bp

Live speech translation with voice cloning for online conferences; local STT/MT/TTS models over a streaming audio pipeline.

EXPERIENCE

Independent AI Engineer & Product Builder 2025 – Present · Remote

Voice agents, document parsing, lead enrichment, and outbound workflow tooling for real users. Stack: FastAPI, React/Next.js, LLM APIs, PostgreSQL, Stripe.
